PRODUCT INFORMATION

Spreader frames aid in the rescue of victims from confined spaces, especially in a vertical rescue situation. These frames are for use with full body harnesses. Traditionally the harnesses required confined space attachments, however the new generation of universal spreader frame has the capability to attach to any full body harness.

PRODUCT FEATURES

- ⇒ 19mm hooks on the "468 frame" attach directly onto the confined space loops or dee rings of any confined space harness
- ⇒ Karabiners on the "Universal Spreader Frame" attach directly onto the shoulder straps of ANY full body harness, making it into a confined space harness.
- ⇒ Top dee ring can be attached to a raising and lowering device. (Tripod and Winch system)
- ⇒ Wrist loops assist in casualty removal from a confined space.
- ⇒ Sturdy frame allows for the worker to comfortable wear a hard hat.
